9 Bennetts Crossing	95043	95043

Bennetts Crossing, proposed intersection improvements

NJDOT Traffic Engineering identified this location due to its poor geometry. Route 9 and CR 626 (Seashore Road) are in close proximity and are connected by Bennetts Crossing, a local road, for a distance of approximately 100 feet. The existing intersection is unsignalized. Problems arise when larger vehicles, including school buses, and/or passenger vehicles queue into the lane of traffic along Route 9 and Seashore Road. An interim improvement will be recommended until a long-term study of the railroad crossings in lower Cape May County can be initiated.

Vicinity of Marshall Avenue to vicinity of Main Street, bridge replacement and roadway improvements

The existing bascule bridge carries two 10-foot travel lanes and a 10-foot shoulder. The replacement will be a fixed structure with a 9-foot, 6-inch vertical clearance from Mean High Water Level on the same alignment. The new structure will have two 12-foot travel lanes and 6-foot shoulders, as well as a 6-foot sidewalk on the northbound side of the bridge. A temporary structure will be constructed next to the existing structure to maintain traffic during construction. Additional roadway improvements will include signaling the Route 50 and Route 49 intersection as well as providing a 15-foot through lane and 12-foot left-turn lane northbound and a 12-foot through lane and 15-foot right-turn lane southbound. The intersection of Route 50 and Tuckahoe-Mount Pleasant Road will be reconfigured to allow for one-way operation of Tuckahoe-Mount Pleasant Road only. Traffic wishing to access Route 50 will be able to gain safer access to the highway through the reconstructed Marshall Avenue and Kendall Lane intersections. 52 Causeway Replacement and Somers Point Circle Elimination	244	244

Bridges over Beach Thorofare, Rainbow Channel, Elbow Thorofare, and Ship Channel, replacement; Somers Point Circle elimination

This project provides for the replacement of four structurally deficient and geometrically obsolete bridges, including two movable bridges, which form a causeway linking the beach resort of Ocean City with the mainland at Somers Point. The causeway will be replaced with a continuous bridge containing high-level fixed spans (i.e. 55 foot vertical clearance) over the two main channels. The new bridge will have improved lane widths and full shoulders as well as a concrete median separating traffic. A wide sidewalk is planned to provide for both pedestrian and bicycle use. Recreational pull-off areas for fishing/pedestrian access are planned on Rainbow Island as well as the first island out of Ocean City. In addition, the project will provide for the elimination of the Somers Point Circle, including a circle cut-through, widening of Route 52 through the circle (two travel lanes in each direction with a center turning lane), and new signalization.
